DESCRIPTION

Collage is a process oriented method in which learners will use a variety of materials to create a visual representation of a story or theme.

INSTRUCTIONS FOR IN-PERSON TEACHING

- Assemble collage materials that are fitting to the lesson theme.
- During the learning session, read the Bible passage, inviting students to listen and create a mental picture.
- Read the passage again, pausing after each verse. During the second reading, invite learners to use the materials available to create a visual representation of the passage.
- Allow time for those who wish to share their work.

INSTRUCTIONS FOR VIRTUAL TEACHING

- Select an online collage creation program.
- Optionally, teachers and/or students may wish to upload photos in advance into the chosen program.
- During the learning session, read the Bible passage, inviting students to listen and create a mental picture.
- Read the passage again, pausing after each verse.
- During the second reading, invite learners to use the application to create a visual representation of the passage. Depending upon the application, this could include use of clipart, word art, stickers, and photos.
- Allow time for optional screen sharing.

IDEAS FOR USING THIS METHOD

- At the beginning of a lesson, use collage to help begin exploration of a topic.
- At the end of a lesson, use collage for reflection and reinforcement.
- This technique can be used with all ages by adjusting materials.
- For an integrated virtual / hands-on experience, create collage kits to be picked up by or delivered to learners in advance of an online lesson.
